

# Requirements

- Users can log in as either an admin or a customer. Admins have the ability to add, delete, and update products in addition to all the functionalities available to customers.
- Users receive personalized recommendations based on their previous purchases and data from the workout app. These recommendations include clothing, food, and equipment, considering stock availability.
- Adds will appear on the page next to the listed items based on users' interests, determined by their purchase history and workout app data.
- To enhance the shopping experience, users can apply filters to display products based on specific criteria, such as size or color.
- Users can search for a specific item using a flexible search feature that supports both full and partial matches.
- Users can choose different options for a product, such as size, color, or quantity, depending on the type of item they are purchasing and also can select how many pieces of a product they want to buy, ensuring they get the exact amount they need.
- Users can add products to their shopping cart or wishlist with a simple click, making it easy to save or purchase items later.
- Users can quickly return to the home page at any time with a dedicated button, allowing for smooth navigation.
- Users can discover similar products while viewing an item, helping them find alternatives or related options.
- Users can view their current wishlist and add products to the cart if they decide to purchase them.

- Users can visualize the current state of the shopping cart, including the price, quantity, and product information for each item.
- Users can edit the products from the shopping cart.
- Users can place an order after completing the shipping form.
